How to Find Under-Priced Domain Names on eBay

- using AutomatedSearches.com

By Dave Moniz

My name is Dave Moniz and I am a professional eBay buyer and eBay PowerSeller.

From my experience, the best way to get under-priced Domain Names or anything else for that matter on eBay is by finding Fixed-Priced and Buy-It-Now listings that are priced below market value. The eBay listings that are regular auctions will never sell at a low price because they will almost always be bid up to the market value. That's the nature of bidding.

Here's how this system works perfectly. This website that I'm teaching you about can automatically and continuously search eBay for ANY ITEM that you want to buy at a low price. When someone lists an item that you are looking for on eBay, you will get an email with a link to the listing.

I personally use this system to make my living on eBay buying items on eBay and reselling items them on eBay. The following pages will show you exactly what to do.

First...

1 1 Choose the eBay site to search

2 Choose the category you want

Computers & Networking/Web Domains & Services/Domain Names/.com

3 Choose the type of listing you want to find

You can choose fixed-price and buy-it-now, Auction items only or All Items

4 Enter Keywords to search for:

If you want all domain names in that category. Edit keywords as needed.

5 Choose the price range you want

6 Choose how often to run the search

7 Name the search and save it when you are ready

That's it!

Whenever Domain Names matching your search get listed, you will get an email with links to the auctions.

Enjoy...
